Listening

## EDUCATION

### BS in Computer Engineering

Islamic Azad University Central Tehran Branch  
[Sep 2018]-[Jul 2022]

## EXPERIENCE & PROJECTS

- October 2022 – December 2024

I have one-year experience at a knowledge-based software company as a full stack developer so have a comprehensive understanding of Back End development and worked on various web software development projects.

I played a key role in a Laboratory Information Management project, where I independently conducted debugging and implemented new features. In another project focused on human resource management, I expanded numerous pages and gained expertise in working with Camunda processes.

- December 2024 – present

I have nearly one year of experience working independently on a cost prediction project, where I have been solely responsible for the design and development of the UI and front-end components from scratch

## SKILLS

- |                             |                        |
