Islamic Azad University
Central Tehran Branch
2018-2022
BS in Computer
Engineering

Language

English:
Speaking 4/5
Reading 5/5
Writing 5/5
Listening 4/5

PROFILE

With more than two years of hands-on experience in web development and debugging, I am passionate about creating seamless, user-friendly web applications. My strong teamwork skills, adaptability, and problem-solving mindset enable me to contribute effectively to any project. I thrive on learning new technologies and continuously improving my craft to deliver high-quality solutions.

EXPERIENCE

full stack developer (Sajaya Negar)

2022/10-2023-12

At a knowledge-based software company, I contributed to diverse web projects, gaining expertise in full-stack development. For a Laboratory Information Management System, I debugged issues and added features using **jQuery**, **HTML**, **CSS**, and a **Groovy**-based back end with the **Moqui** framework. In a Human Resource Management System, I expanded pages and optimized workflows with **React**, **Groovy**, and **Camunda**, enhancing process efficiency. These projects refined my problem-solving skills and strengthened my ability to deliver robust, user-friendly solutions across the stack.

Software development expert (Padideh Shimi Gharb)

2023/12-present

I have nearly a year of experience independently developing internal management systems, including designing and building interfaces to display sales data for managers. I handled the entire process, from creating the UI to implementing core functionality, ensuring a seamless user experience. In this project, I utilized **C#**, **SQL**, and **React**, which allowed me to deepen my understanding of C# project structure and refine my full-stack development skills. This hands-on experience showcased my ability to manage projects independently and deliver effective, user-focused solutions.

My Portfolio

2024/06

I designed and developed my portfolio using **React**, integrating advanced animations with **GSAP** and **Framer Motion** to create an engaging and interactive experience. To enhance its visual appeal, I utilized **Three.js** for 3D elements and crafted custom 3D models in **Blender**. This project showcases my ability to combine creative design with technical expertise, delivering a polished and dynamic web application.
